White	ARL320W	20mm	20mm	3m	60

Installation instructions:

The corner wall trim is supplied with high grab pressure sensitive adhesive pre-applied to the backing and is designed to be installed on a clean, smooth surface. Ensure surface is levelled, clean and smooth prior to removing the adhesive protection and applying the corner wall trim to the surface. When the corner wall trim has been fitted we recommend using a small roller along the entire length to ensure firm adherence. It is recommended that a bead of silicone adhesive is run along the bottom edges of the trim to fill in any surface variations.

Safety statement: When cutting or drilling aluminium we recommend the use of safety glasses and gloves.
