

INTRODUCING THE **NEW** PROTIMETER MMS2 FLOORING KIT

A multi function moisture meter with the most innovative humidity sleeves system available

MMS2 - All-in-One Moisture Meter

The Protimeter MMS2 is the industry's most advanced all-in-one moisture meter. Its ergonomic, 4-in-1 design allows one-handed operation to measure moisture on and below the surface, as well as in ambient air and humidity and in concrete floor slabs. A non-contact infrared thermometer measures surface temperature and calculates the dew point. The MMS2 incorporates instant moisture measurement using pin and non-invasive techniques to provide accurate readings in wooden floors and reference reading in concrete floor slabs.

MMS2 All-In-One Moisture Meter Features:

- Pin moisture measurement
- Non-invasive moisture measurement
- Ambient relative humidity and temperature measurement
- Equilibrium humidity measurement in concrete floors
- Psychometric calculations
- Laser pointer surface non-contact temperature measurement
- Data logging
- Firmware upgradeable

Applications:

- Concrete floor Relative humidity testing
- Concrete floor rapid evaluation with non-invasive testing
- Non invasive testing through floor covering
- Wood moisture measurement of sub-floors and finishes
- Ambient Relative Humidity, temperature and Dew point measurement
- Non contact surface temperature measurement and surface Dew point detection

**What you can't see
matters most**

Kit Components:

- ◆ Protimeter MMS2
- ◆ 20 x Adjustable Humidity Sleeves
- ◆ Carbide Tipped Spiral Masonry 3/4" (19mm) Drill Bit & Drill Stop
- ◆ Wire Cleaning Brush
- ◆ 5 x Protimeter Mini Hygrostick Probes
- ◆ Mini Hygrostick Insertion and Extraction Tool
- ◆ Mini Hygrostick Extension Lead
- ◆ Salts Calibration Test Bottle & Adaptor
- ◆ Data Cable & Software
- ◆ Rugged Carrying Case
