

FUSION™ ENGINEERED SEAM WEIGHT

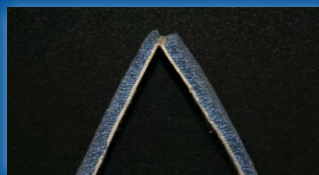

"Don't just seam it—SET IT!"

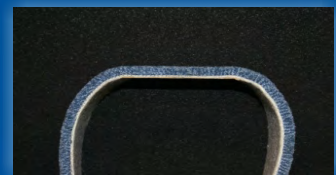

- **12-lb (5.44 kg) weight sets carpet seam in place while the seam cools, but will not leave a profile on carpet.**
- **363 vent holes for quicker cooling.**
- **6½" x 13" (16.52 cm x 33 cm) vented heavy-duty plastic base provides full pressure for even wide seam tape jobs and will not get hot, warp or rust.**

The FUSION™ Carpet Seam Weight has been ENGINEERED to make perfect seams every time. It was designed by installers to perform better than any other seam weight or tool box.

As part of the TRAXX Carpet Welding System, the FUSION™ Seam Weight sets carpet seams that virtually eliminate seam visibility and peaking!

...without Fusion™!
